Written in a simple, simple style, this book includes a number of practical business examples to facilitate learning. The purpose of the ninth edition of Business Forecasts is the same as in previous editions: to present the basic statistical methods that are useful in the development of business forecasts and long-term plans. The book is written in a simple and simple style and includes a large number of practical business examples. Sixty-five cases are distributed at the end of chapters to show the student how theoretical concepts are related to real applications. Particular attention is paid to the application of decision-making methods by company management. Students should have a basic knowledge of statistics and are familiar with using a computer to access word processing software packages and spreadsheets. CHAPTER 1. Introduction to forecasts in businessCAPTULO 2. Overview of the main statistical concepts of CAP-TULO 3. Studying data models and introducing COA-TULO 4. Methods of moving medium and mitigation CAP-TULO 5. The time series and its components CAP-TULO 6. Simple linear regression CAP-TULO 7. There is a lot of regression analysis of CAP-TULO 8. Regression with time-series data CAP-TULO 9. Box-Jenkins Methodology (ARIMA)Chapter 10. Predictions of judgments and adjustments to the CAP-TULO 11 forecast. The administration of the forecasting process AP-SDICE A. Data data on the case 7-IAP-PINDICE B. TablesAP-SDICE C. Dataset and the database Target of the ninth edition of business forecasts is the same as in previous publications: to present the basic statistical methods that are useful in the development of business forecasts and long-term plans. The book is written in a simple and simple style and includes a large number of practical business examples. Sixty-five cases apply at the end of the chapters to how theoretical concepts relate to real applications. Particular attention is paid to the application of decision-making methods by company management. Students should have a basic knowledge of statistics and are familiar with using a computer to access word processing software packages and spreadsheets.
